

Who Should Take This Training?

- Frontline providers and operations staff overseeing implementation and sustainment of a clinical program or evidence-based practice in a VA health care facility
- Health care teams implementing best practices and leading change in their health systems with previous background in process improvement or quality improvement methods

About Us

LHI is funded by the VA Quality Enhancement Research Initiative (QUERI). Derived from the [VA Quality Scholars \(VAQS\)](#) program, it was developed by QUERI investigators to train frontline providers and operations staff in a single methodology derived from evidence-based strategies for quality improvement and leadership skills for change management. The goal of LHI is to improve healthcare by increasing VA's frontline capability to implement and sustain effective practices.

Feedback from recent learner:

"This was the best training course I have ever participated in across my 15 years of professional practice and graduate coursework experience. The 'flipped classrooms' with lecture content and written exercises *before* class coupled with a heavy focus on interactive discussion with the same cohort of trainees was exceptional."

"Brainstorming potential facilitators and barriers. Helped to gain knowledge about how to get buy in from key stakeholders."

"Engaging key team members"

Facilitators

Kyler Godwin,
PhD, MPH

Kelley Arredondo,
PhD

Anthony Ecker,
PhD

Lindsay Vaclavik,
MD,
